US

Dear DENR,

I am writing to concerning the draft Air Permit that South Dakota issued for the Hyperion Energy Center.

I am asking that the final Air Permit be delayed until a full fledged Environmental Impact Statement be conducted so that the environmental and socio-economic impacts of this project can be fully understood.

Second, I request that all known damaging and carcinogenic effects be included in the Air Permit. While these are not required by the US Environmental Protection Agency, we believe that new projects should be held to higher community standards in order to protect the long term health of neighbors.

Third, I request that odor be included in the air permit.

I am looking forward to your written response to my concerns.

Thank you.
